Electronic Submissions

- In the course of your studies you will be expected to complete a variety of diagrams, tables and figures.
- Although these can be drawn by hand, electronic versions are neater and can be easily re-used.
  - You may also find yourself in a situation requiring electronic submission…like the year 2020.
- The following tools can help you quickly and efficiently create your diagrams electronically:
  - Draw.IO
  - Microsoft Office/OpenOffice
- You may also use imaging technology to include hand-drawn items in electronic reports.

Draw.IO

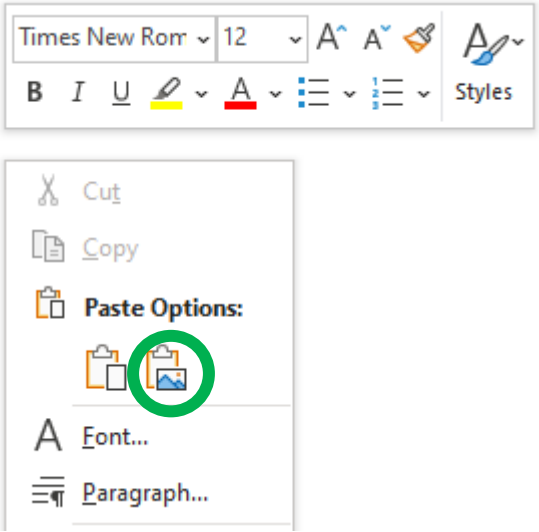
- Open Source diagram software.
- Available in online and offline versions.
  - Online:https://app.diagrams.net/
  - Offline: https://github.com/jgraph/drawio-desktop/releases
- To create network diagrams:
  - Open a new, blank diagram.
  - Click 'More Shapes…' in the lower left.
  - Select 'Networking - > Network' and 'Cisco'
  - For consistency sake, don't select any others.
- Once your diagram is complete you can:
  - Export it as an image for inclusion in other documents.
  - Save it as a .drawio file for future use.

Office Software

- Although Microsoft Office is the most common, if you don't have access to it there are Open Source alternatives:
  - OpenOffice
  - LibreOffice
  - Writer=Word, Calc=Excel, Impress=PowerPoint
- RMC email accounts can sign up for free access to Office365. (Web Apps only, no PC install.)
- Creating diagrams and tables in MS Word can be clunky and cumbersome.
  - Use Excel for tables,
  - Use PowerPoint for diagrams,
  - Paste into MS Word *as images* for easier formatting.

Office Software – Paste As Image

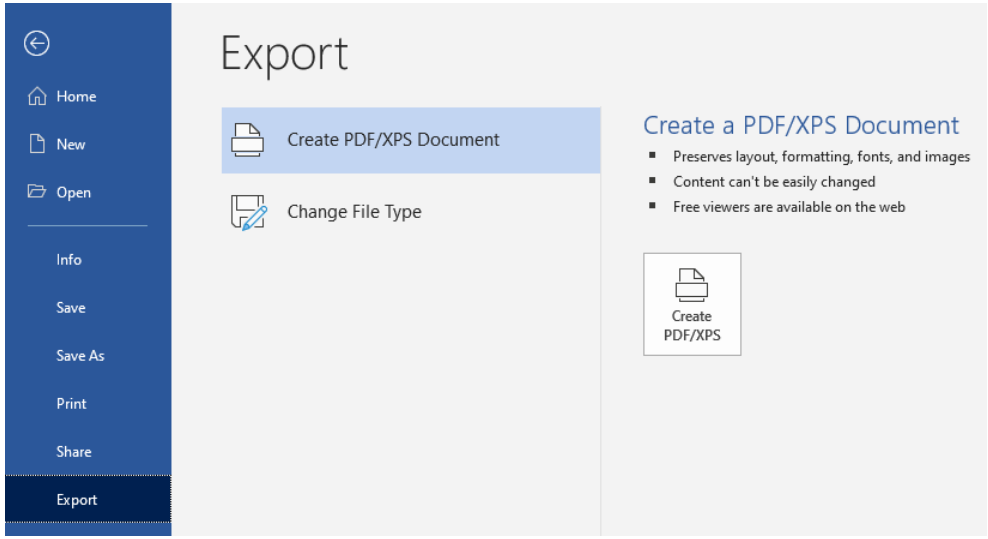
- To quickly and easily paste Excel tables and PowerPoint slides as images, right-click and choose ‘Paste Options’.
- Click ‘Picture’.



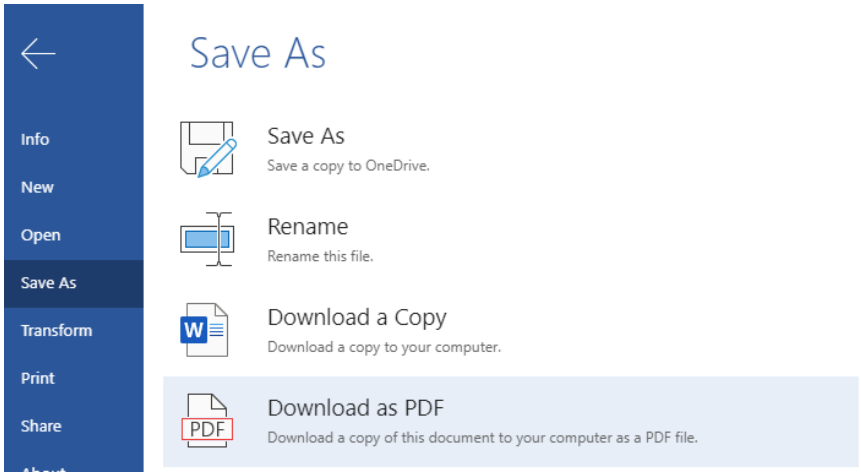
Office Software – Export to PDF

- Exporting Office documents to PDF is very easy:

MS Word – PC Install



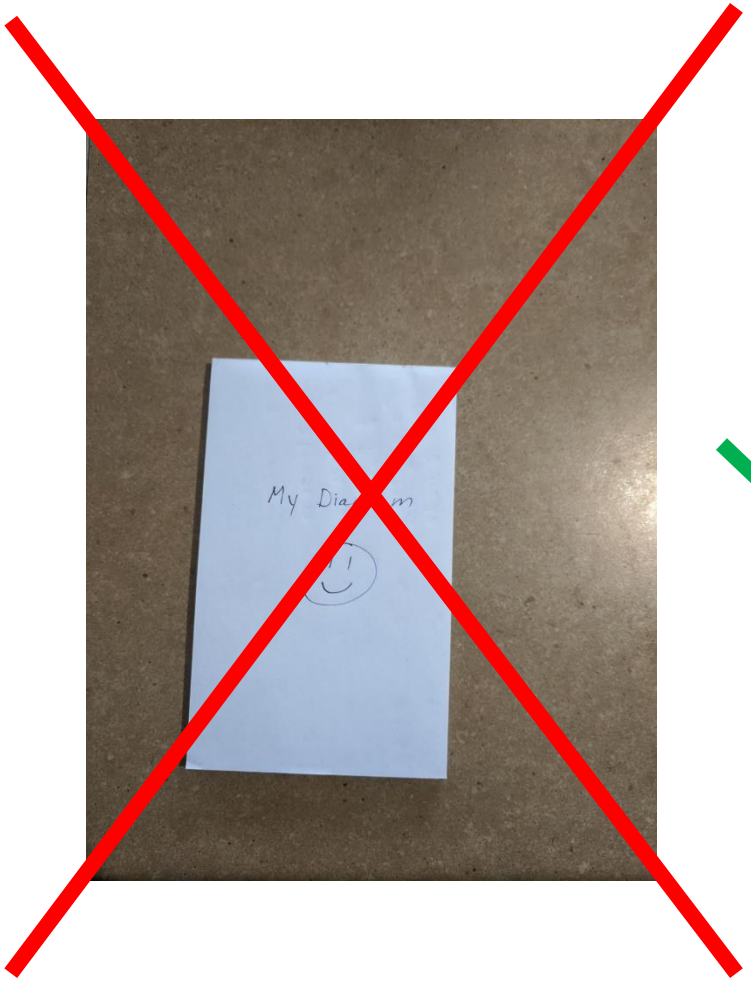
MS Word – Office 365 Web App

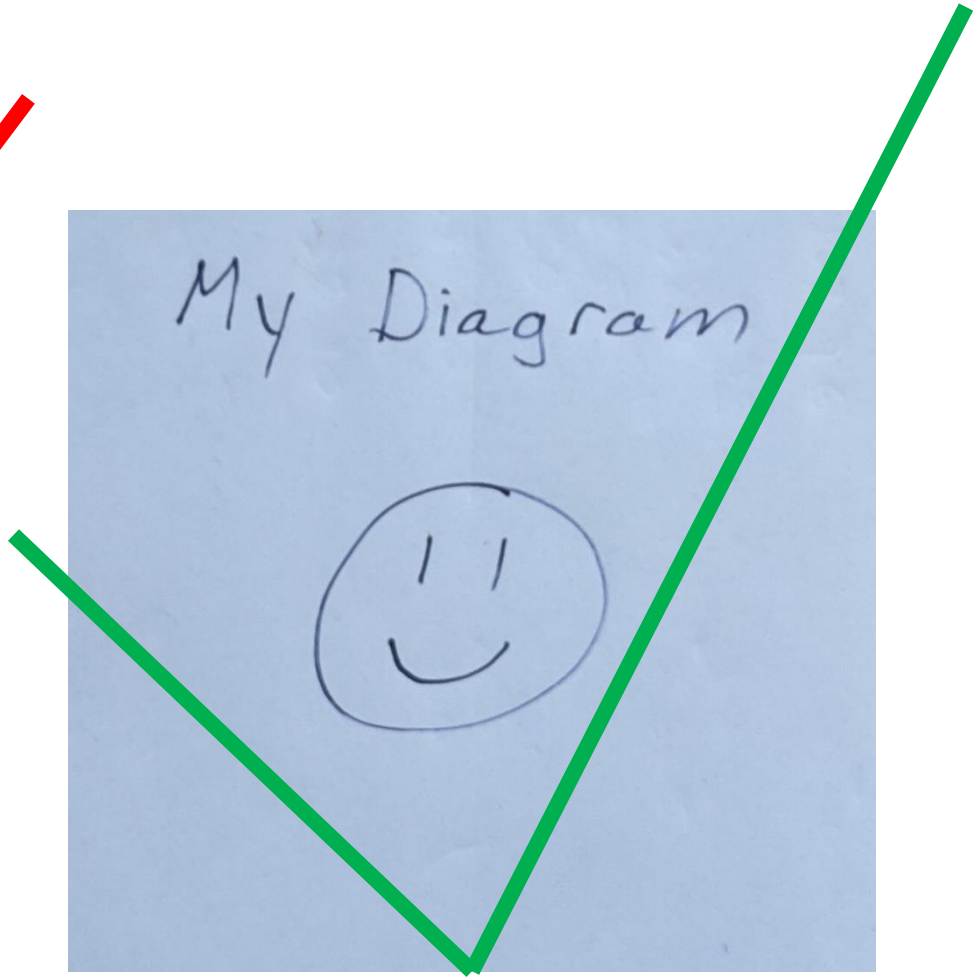


Imaging Technology

- You may use scanners or cameras to include hand-drawn notes and diagrams provided they are:
  - Neat,
  - Labeled,
  - *Legible,*
  - Properly cropped,
  - Resized to < 1MB
- MS Paint is generally adequate for this.
- GIMP is an Open Source image editing tool you may also find useful…though much harder to use.

Imaging Technology





EEE330 Submission Requirements

- All reports or assignments allowing electronic submission *must* be submitted in PDF format.
- Unless otherwise directed, all documents related to an individual report or assignment should be submitted as a single PDF file.
- Hand-drawn diagrams and equations are permitted but MUST follow the given guidelines.
- Hand-written notes are *not* permitted. Text is to be typed out electronically.
